EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Gates (Reg. #20,848) on August 20, 2004.

Amendments to the claims are as follows:

Cancel claim 7.

4. (Currently Amended) A semiconductor laser element according to claim 3, further comprising:
a first electrode provided on a lower surface of the semiconductor substrate; and
said common electrode being located [a second electrode provided at least] on an [a]
upper surface of the semiconductor laser region.

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 5, 6, and 8, directed to a non-elected species, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

Art Unit: 2815

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1, 3-6, 8-14, and 20-28 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to claim 1, the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including: having a common modulation electrode traversing and covering only the laser emission portions; and wherein the material comprising the first wave-guiding layer is different from that of the active layers of the laser emission portions.

In regards to claim 28, the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including: having a common modulation electrode traversing all of the laser emission portions and covering only the laser emission portions; and wherein the material comprising the plurality of second wave-guiding layers is different from that of the active layers of the laser emission portions.

Art Unit: 2815

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
